SUMMARY

I build scalable web applications and AI-powered solutions to solve real-world problems.

EDUCATION

University of Jember
Bachelor of Informatics *2022 – Present*

EXPERIENCE

Backend Developer Mar 2025 – Jul 2025
Diskominfo Banyuwangi
- Backend Development
- API Development
- Database Integration
- System Maintenance

Machine Learning Cohort Sep 2024 – Mar 2025
Bangkit Academy 2024
- Machine Learning
- Deep Learning
- TensorFlow
- Data Analysis
- Model Deployment

Head of Technology Sub Division 2024
HMIF UNEJ
- Project Management
- Team Coordination
- Website Development

Technology Staff 2023 – 2024
HMIF UNEJ

PROJECTS

Waste Overload Detection Using YOLOv8 | Detection of overload areas in open temporary waste disposal sites using computer vision and deep learning.
- Category: Research & AI
- Tech Stack: Python, YOLOv8, OpenCV, Ultralytics

HMIF Website
- Category: Web Development
- Tech Stack: Next.js, React, MySQL, Tailwind
- Organization Information
- Event Management
- Member Information

Job Portal System
- Category: Full Stack Development

- Tech Stack: React, Node.js, Express, MySQL
- Authentication
- Job Listing
- Applications
- Company Management

AgroVision
Flutter Todo App
REST API Projects
Course Projects

TECHNICAL SKILLS

Software Engineering
Backend Development
Machine Learning
Computer Vision
Organizational Leadership
Python
React
Next.js
Express.js
Laravel
MySQL
YOLOv8
TensorFlow
TypeScript
Tailwind CSS
Flutter
Node.js
Golang
Flask
REST API
PostgreSQL
OpenCV
Git
GitHub
Linux
Docker
Firebase

CERTIFICATIONS

Bangkit Academy 2024
Advanced Computer Vision with TensorFlow
Supervised Machine Learning
Custom Models, Layers and Loss Functions
Unsupervised Learning, Recommenders and Reinforcement Learning

CAREER INTERESTS

Backend Engineering; Software Engineering; Artificial Intelligence; Machine Learning; Computer Vision

RESEARCH FOCUS

Computer Vision; Deep Learning; Semantic Segmentation; Object Detection

CURRENT RESEARCH

Detection of Overload Areas in Open Waste Disposal Sites Using YOLOv8

QUICK STATS

4+ Years Learning Software Development; 10+ Projects Built; 1 Industry Internship; 1 Machine Learning Program Graduate

FUNCTIONAL REQUIREMENTS

FR-01 User can view profile information; FR-02 User can browse experiences; FR-03 User can view projects; FR-04 User can open project detail pages; FR-05 User can download resume; FR-06 User can submit contact form; FR-07 User can open external links; FR-08 Website supports dark mode

NON FUNCTIONAL REQUIREMENTS

Performance: Lighthouse Score > 90, First Load < 2 Seconds; SEO: Meta Tags, Open Graph, Schema Markup, Sitemap, Robots.txt; Accessibility: Responsive Design, Keyboard Navigation, Alt Text; Security: HTTPS, Rate Limiting, Spam Protection

TECH STACK (WEBSITE)

Frontend: Next.js 15, TypeScript, Tailwind CSS, Framer Motion, shadcn/ui; Backend: Next.js Server Actions; Deployment: Vercel; Analytics: Google Analytics, Microsoft Clarity

FUTURE ROADMAP

Blog System; Admin Dashboard; Visitor Analytics; Multi Language; AI Chat Assistant; Project CMS; Research Publication Section; Recommendation Engine for Recruiters
